

VitalsRx Health Monitor

Your Well-Being in the Palm of Your Hand.

Actual Size

All-In-One Design

FDA Cleared

"The Bodimetrics Monitoring device is a major breakthrough in allowing health care providers to use state of the art telemedicine technology to accurately evaluate the vital functions of at risk individuals at home or work. This capability should help to achieve the nation's health care Triple Aim: improve care and patient experience and reduce costs."

- Dr. Bart Wald, MD

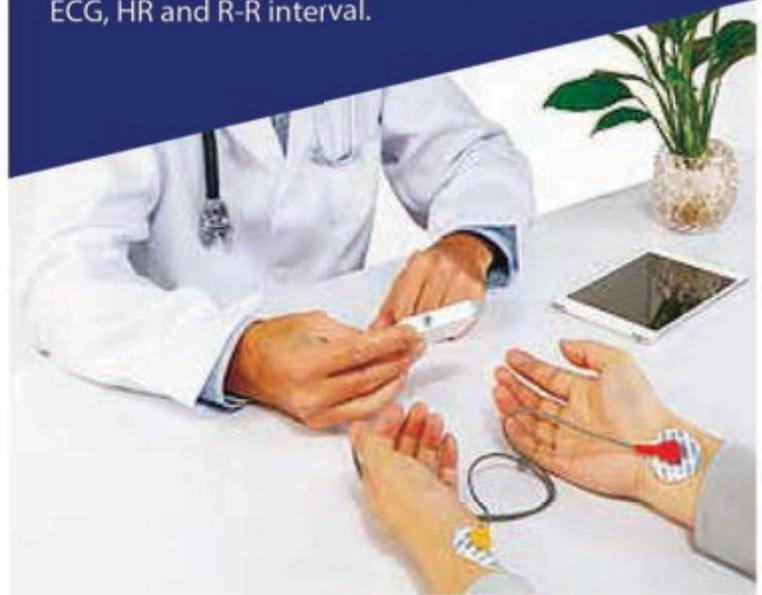

Continuous SpO2 Monitor & OSA Screening Report

Comfortable, portable and reliable monitoring of SpO2. Detects and reports oxygen desaturation caused by OSAS for up to 10 hours providing clinicians cost effective OSA screening.

Powerful & Portable ECG Recorder

Supports both cable and cable-free ECG measurement. Cost effectively extend cardiac monitoring with continuous ECG functionality. Captures ECG, HR and R-R interval.

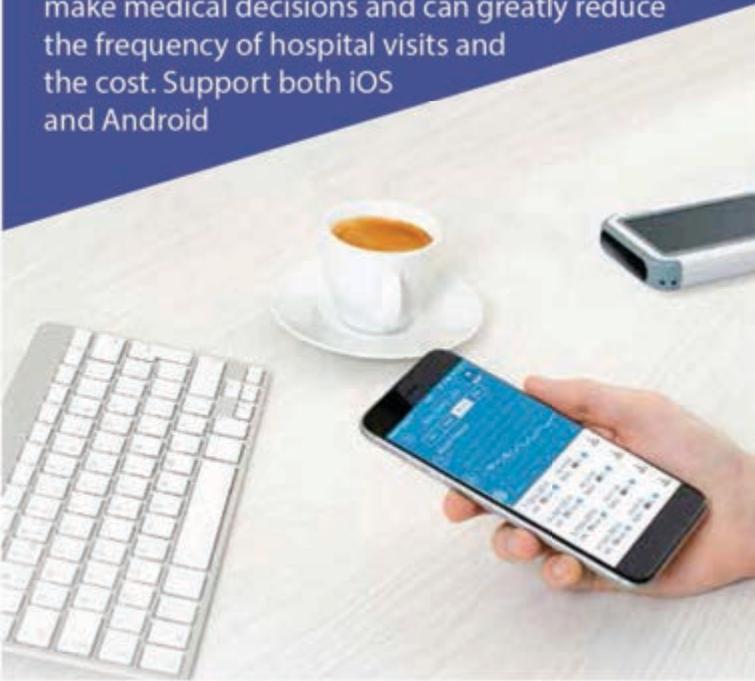

"The BodiMetrics Monitor is a great easy to use solution, whose small size and sophistication allows me to quickly screen my patients' vitals, whether they're at home or on the road."

– Dr. Roy Artal, Pulmonologist and Sleep Apnea Specialist

APP

With built-in Bluetooth, data can be exported from device to phone/table installed with APP. Track the trend of heart rate, SpO2. The results can also be sent to doctor by email so that the users can communicate with doctor remotely. It helps doctor to make medical decisions and can greatly reduce the frequency of hospital visits and the cost. Support both iOS and Android

Stress Management

"Relax Me" Exercises utilize Heart Rate Variability (HRV) captured from ECG waveforms to help patients reduce stress levels through active monitoring and breathing exercises.
